Irago Conference

29th October 2019 **2019**

Insights into the Sustainable Development Goals: **What About The Earth's Resources?**

Core areas covered
by the invited speakers
in this year's conference:

- Water resources
- Overview of the UN SDGs program
- Sleep as a resource for a productive life
- High precision measurement of time
- Artificial proteins for food production

Abstract Submission and Registration Starts on: Thursday 1st August 2019
Deadline of Abstract Submission: Tuesday 10th September 2019

Invited speakers (tentative):

Gonzalo Delacámara (IMDEA Water, Spain)
Title: Water Economics/Water Resources (Tentative)

Junko Nakai (Food and Agriculture Organization of the United Nations, Italy)
Title: Sustainable Development Goals - Reclaiming Circularity, Local Connectivity and Reverence

Toshihiro Nakamori (Fuji Oil Holdings Inc., Japan)
Title: Plant Based Foods Solutions

Hirofumi Toda (University of Pennsylvania, USA)
Title: A Molecular Link between "Sleep and Immunity" A novel sleep-inducing gene, "*nemuri*" functions as anti-microbial peptide

Masami Yasuda (National Institute of Advanced Industrial Science and Technology (AIST),
National Metrology Institute of Japan (NMIJ), Japan)
Title: Activities of NMIJ, AIST towards the Redefinition of the SI Second

Enquires: Email: irago@office.uec.ac.jp
Phone: 81-(0)42-443-5736

The Irago Conference

The world is at a major turning point. Recent changes in global economics and industrial priorities, environmental and energy policies, food production and population movements have produced formidable challenges that must be addressed for sustaining life on earth.

The objective of this conference is to provide an 'interdisciplinary-platform' to enhance mutual understanding between scientists, engineers, policy makers, and experts from a wide spectrum of pure and applied sciences in order to resolve the daunting global issues facing mankind. In particular, the organizers would like to encourage graduate school students to participate and talk directly with internationally renowned academics, industrialists, and opinion leaders for a firsthand view of the major issues facing scientists and engineers of the 21st century.
